Sociolinguistics in selected textbooks used for teaching Polish as a native language in a primary school

Szymonka Maria

Article, 2016-01-01 | sociolinguistics competence | language teaching | polish language teaching

+2

The text is an effort to present a change which took place at the turn of centuries in teaching Polish as a native language. It is, first of all, about a new sociolinguistic perspective in teaching Polish which appeared at schools. The author analyses four selected series of textbooks used for teach...

The Relationship between Social Identity and Foreign Language Learning Motivation: The Sustainability of Heritage Language Learners

Lidia Miguel Diaz Samartín

Article, 2021-11-01 | foreign language teaching | foreign language learning | heritage language learning

+3

This study aimed to explore the relationship between social identity and language learning motivations of a group of heritage Spanish language learners in a university environment in the United States. Based on the qualitative research inquiry with semi-structured interview and focus...

Growth analysis of rape during the binding and formation of pods

Barbara Spychalski, Grzegorz Pielkiewicz, Adam Łasicki +2 authors

Article, 2018-10-01 | rape | culture population | hybrid variety

+2

Field experiment was conducted to analyze the growth dynamics of the oilseed rape and the filling of pods in two types (cv. Inesedy population and cv. Hymus H1 hybrid). The variant of quantitative growth analysis for a single plant was chosen. It was found that the hybrid variety has a higher...

The Unwanted Heritage of Prefabricated Wartime Air Raid Shelters—Underground Space Regeneration Feasibility for Urban Agriculture to Enhance Neighbourhood Community...

Paweł Marczak, Leszek Świątek

Article, 2021-11-01 | underground space recycling | heritage management | urban farming

+2

The article deals with the problematic heritage associated with the system of Nazi German underground air raid shelters currently located within the Polish state, in the walled part city of Szczecin. The unwanted heritage has been inventoried, archival materials collected, and...

Analysis of Heat Loss of a Biogas Anaerobic Digester in Weather Conditions in Poland

Tomasz Janusz Teleszewski, Mirosław Zubowski

2018-07-01 | biogas anaerobic digester | heat demand | heat losses

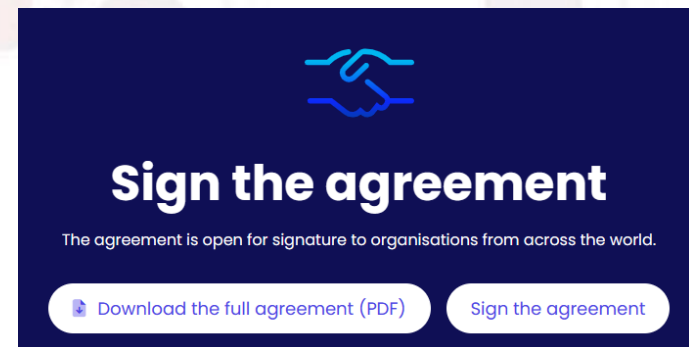

Currently in Poland, the construction of biogas plants is growing as alternative energy sources. Often, technical solutions for design and building of biogas plants are transferred to Poland from countries in which these technologies are developed without taking into account the specific...

OPERAS has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreements No 731031 (OPERAS-D), No 731162 (HIRMEDS), No 871069 (OPERAS-P), and No 863420 (TRIPLE).

Reforma ewaluacji

- Rozpoznanie różnorodności praktyk badawczych
- Nacisk na ewaluację jakościową wspieraną wskaźnikami ilościowymi
- Ograniczenie stosowania rankingów
- Tematyczne grupy robocze
- Współpraca z jednostkami naukowymi (top-down/bottom-up)

Czasopisma: model diamentowy

- Analiza systemu otwartych publikacji w Europie
- Praca z IPSP (Institutional Publishing Service Providers)
- Przygotowywanie wytycznych, standardów, wskazówek, materiałów i modeli biznesowych

Wsparcie infrastrukturalne: CRAFT-OA

The project focuses on four threads of activities
to improve the technical and organisational infrastructure of Diamond OA.

Provide

technical improvements for
journal platforms and journal
software.

Build

communities of practice to
foster overall infrastructure
improvement.

Increase

visibility, discoverability and
recognition for Diamond OA
publishing.

Integrate

Diamond OA publishing with
EOSC and other large-scale
data aggregators.

Abstract

This essay discusses the concept of discovery, intended as content discovery, and defines it in the new context of Open Science, with a focus on Social Sciences and Humanities (SSH). Starting from the example of Google Scholar, the authors show that this well established service does not address the current needs, practices, and variety of discovery. Alternatives in terms of technical choices, features, and governance, do however exist, offering richer and more open discovery. The paper presents in particular the implementations and research work of the H2020 project TRIPLE (Transforming Research through Innovative Practices for Linked Interdisciplinary Exploration). Dedicated to the building of a discovery platform for the SSH, the project is meant to address the specificities and evolution of discovery in this field.

Coalition for Advancing Research Assessment

Our vision is that the assessment of research, researchers and research organisations recognises the diverse outputs, practices and activities that maximise the quality and impact of research. This requires basing assessment primarily on qualitative judgement, for which peer review is central, supported by responsible use of quantitative indicators.

OPERAS has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreements No 731031 (OPERAS-D), No 731032 (HIRMEOS), No 871069 (OPERAS-P), and No 863420 (TRIPLE).
